ASK-PB1: Phantom Business Registration — Originating Act

Classification: IRS-CI Binder Tab 7 Addition
For: April 20, 2026 In-Person Meeting — SA Zacheranik / SA Pletscher
Priority: HIGH — Foundational act enabling all subsequent false filings

The Ask

Request AADE to identify, through MLAT or direct production:

1. **The originating registration act** for the business activity on AFM 044594747 (Stamatina Kyprianos) dated 26/05/1992 — including the Δ210 or equivalent physical DOY filing that created this registration
2. **The custodian** — the DOY office (ΔΟΥ Α' ΠΕΙΡΑΙΑ / ΣΠΕΤΣΩΝ) and the registering official (name, employee ID) who processed the 1992 filing
3. **The complete modification trail** from 1992 to present, including:
   - Any digital migration records from the physical DOY system to TAXISnet
   - All subsequent modifications to business status, VAT regime, or address
   - Any linkage records between AFM 044594747 (Stamatina) and AFM 051422558 (John, deceased)
   - The system event that generated the A.1058/2026 POS compliance push to AFM 051422558 on 31/03/2026 — explaining why a compliance obligation for a business on one AFM was routed to a different (deceased person's) AFM

Why This Matters for the Criminal Case

This record establishes the **earliest known date of identity compromise** — 26/05/1992, twenty-nine years before John's death and thirty-two years before any known actor in the current case (Lyrakis, Efthalia Kyprianou, Papageorgiou) entered the picture.

The phantom business registration is the **foundational act** enabling all subsequent exploitation:

- It proves a Greek business identity was created on a U.S. citizen's AFM without her knowledge or consent
- The 1992 date predates TAXISnet entirely — this was a physical DOY filing by someone who walked into an office
- The business remains ΕΝΕΡΓΗ in AADE's current registry despite ΠΑΥΣΗ ΕΡΓΑΣΙΩΝ logged at 31/12/1999

- AADE's automated system continues to generate POS compliance obligations against the deceased husband's interlinked AFM as recently as 31/03/2026

For the U.S. tax fraud case specifically: the phantom Greek business identity is what enabled the false Form 1116 Foreign Tax Credit claims ($24,016 overstated, 2021–2024) that are the subject of IRS CI Case 26236541 and AAA Arbitration Case 01-26-0001-2493. Without the phantom business creating the appearance of Greek tax obligations, the fabricated foreign tax credits on the U.S. returns have no source.

Cross-AFM Finding (NEW — 31/03/2026)

The phantom business is registered on **AFM 044594747** (Stamatina), but AADE's automated A.1058/2026 POS compliance notification went to **AFM 051422558** (John, deceased 13/06/2021). This cross-AFM routing means:

- AADE's internal systems link the two AFMs in a way that routes business obligations across identities
- A dead man's AFM is receiving compliance notifications for a business registered to his living widow
- The system cannot — or does not try to — distinguish between the deceased and the survivor

This is directly relevant to the false E1/E2 filings (2021–2024) on AFM 051422558 by Accountant Aggeliki Papageorgiou: the system infrastructure that enables cross-AFM confusion is the same infrastructure that was exploited to file false returns.

Evidence Supporting This Ask

Exhibit	Description
E-38	Phantom business registration data (comregistry, 1992)
E-39	A.1058/2026 POS compliance push to AFM 051422558 (31/03/2026)
E-40	myAADE comregistry screenshot — AFM 044594747, ΕΝΕΡΓΗ, 26/05/1992 (captured 31/03/2026)
