AFM Reconciliation — RESOLVED

What the Portal Shows

On 31/03/2026, the myAADE comregistry (Τρέχουσα Εικόνα Οντότητας/Επιχείρησης) was accessed under Stamatina's login. The business registry returned:

The AFM Question — Answer

The phantom business is registered on **AFM 044594747 (Stamatina's)** — not AFM 051422558 (John's) as previously stated in C-10/C-11.

However, the A.1058/2026 POS compliance notification (31/03/2026 01:00) was pushed to **AFM 051422558 (John's)** — a dead man's AFM. This means:

1. **AFM 044594747 (Stamatina's):** Carries the phantom business registration since 1992. A living U.S. citizen has a Greek business she never created, never operated, and never knew existed. This was registered when she was already a U.S. resident. The registration predates TAXISnet (physical DOY filing). She has never filed a Greek business tax return.
2. **AFM 051422558 (John's):** Receives POS compliance notifications as of 31/03/2026, despite the AFM holder dying on 13/06/2021. The A.1058/2026 push treats this dead person's AFM as having active business obligations.

This is the "both" scenario — and it is worse than either single-AFM finding alone. The phantom business sits on Stamatina's AFM, but AADE's automated systems are generating compliance obligations against John's AFM. The two AFMs are interlinked in the system in a way that creates obligations for both a dead person and a living person who never consented to business registration.

Implications

For Stamatina (044594747)	For John (051422558)
Unauthorized business since 1992	POS compliance obligations to a dead man
GDPR Art.5(1)(d) — accuracy violation	Post-mortem identity exploitation
GDPR Art.15 standing confirmed	Confirms continued system abuse of deceased AFM
Potential unauthorized tax obligations generated	Connects to E1/E2 false filings (2021–2024)
"I never created this business"	"He's been dead since 2021"

Repo Correction Required

C-10 and C-11 in `tab2-contradiction-matrix.md` currently reference AFM 051422558 for the phantom business. This should be corrected to reflect:

- **C-10:** The phantom business is registered on AFM **044594747** (Stamatina), start date 26/05/1992, shown as ΕΝΕΡΓΗ in comregistry
- **C-11:** The A.1058/2026 POS push went to AFM **051422558** (John) — creating a cross-AFM contradiction where the business is on one AFM but compliance obligations are generated against a different (deceased) AFM

This cross-AFM linkage is itself a new contradiction point that strengthens the case: AADE's systems are not only maintaining phantom activity but are routing compliance obligations across AFMs in a way that obscures which identity is being exploited.

C-10 — Corrected

Field	Value
#	C-10
Date(s)	1992 vs 2026 (34 years)

Field	Value
Agency	AADE (TAXISnet / comregistry)
Statement A	AADE comregistry shows business activity on AFM 044594747 (Stamatina Kyprianos), registered 26/05/1992, status ΕΝΕΡΓΗ, address ΣΠΕΤΣΕΣ 0 ΤΚ:18050
Statement B	Stamatina Kyprianos (U.S. citizen, Michigan resident) never created, operated, or authorized any Greek business. She has never filed a Greek business tax return.
Contradiction	A living U.S. citizen has a 34-year-old phantom business on her AFM that she never created. The business was registered at a physical DOY office in 1992 — someone walked in and created this.
Intent/Impact	Unauthorized identity use: The 1992 registration predates all known actors except the family itself. The question of who registered this — and why — is foundational. If Stamatina didn't, someone used her identity at a DOY office 34 years ago.

C-11 — Corrected

Field	Value
#	C-11
Date(s)	31/03/2026 (same day)
Agency	AADE (myAADE automated + Ticket system)
Statement A	myAADE pushes A.1058/2026 POS compliance to AFM 051422558 (deceased John Kyprianos) at 01:00 — treating a dead man's AFM as having active business obligations
Statement B	The actual phantom business is registered on AFM 044594747 (Stamatina) — a different AFM. AADE Ticket system: 43-day silence on Δ210/Δ211 complaint about this phantom business.
Contradiction	AADE generates POS compliance obligations against a dead person's AFM for a phantom business registered on a different living person's AFM. The automated system cannot correctly identify which AFM holds the business — or the two are interlinked in a way that creates obligations against both. Meanwhile, the human complaint system ignores complaints about the same phantom business for 43 days.
Intent/Impact	Cross-AFM system-level self-incrimination: The A.1058/2026 push to a dead man is a machine-generated admission that AADE's records are systemically corrupt. The 43-day silence is the human component choosing not to look. The cross-AFM routing of compliance obligations proves the system cannot distinguish between the deceased's identity and his widow's — or is deliberately conflating them.

Significance	Proves the phantom business exists on Stamatina's AFM (not John's as previously assumed). Combined with E-39 (A.1058/2026 to John's AFM), establishes cross-AFM identity confusion in AADE systems.
